INTRODUCTION.....	2
Exchange Server 2019 and PowerShell.....	2
Why PowerShell and Not the Exchange Admin Center [a.k.a. the GUI].....	2
Exchange Management Shell .....	3
Command Structure.....	3
Cmdlet Examples.....	4
Piping.....	4
Caveats .....	6
Protecting Yourself and What If .....	6
Command Discovery Techniques.....	6
Getting Help!?!.....	8
Idiosyncrasies .....	9
What's Next? .....	11
<u>1.</u> PowerShell Basics .....	12
Exchange Server 2019 PowerShell: Where to Begin.....	12
Variables.....	12
Arrays .....	12
Hash Tables.....	13
CSV Files.....	13
Operators.....	14
Loops.....	15
Foreach-Object .....	15
Do { } While () .....	16
Export-CSV .....	17
Functions.....	18
PowerShell Tools.....	18
Visual Studio Code .....	18
VSC Plug-ins and More .....	21
Bracket Pair Colorize.....	21
GitLens.....	22
Code Spell Checker .....	22
Good Features.....	22
Git Integration.....	24
Alternatives to Visual Studio Code (VSC).....	25
<u>2.</u> Beyond the Basics .....	26

Formatting.....	26
Capitalization.....	26
Commenting.....	27
Mind Your Brackets! .....	29
Command Output .....	31
Filtering.....	32
Splitting .....	33
Scripting in Color.....	36
Miscellaneous.....	39
Obfuscated Information.....	41
Special Switches .....	41
-Status .....	41
-IncludeReport .....	43
Code Signing.....	44
What is it? .....	44
Why Use It? .....	44
How to Use It.....	45
Signing Your Code .....	46
Write-Progress.....	48
<a href="#">3. Building Scripts.....</a>	25
Introduction .....	25
How to Begin.....	25
Sample Scenario .....	25
.NET Requirement Installation .....	52
Unified Communications Managed API 4.0 Requirement Installation .....	58
Windows Feature Requirement Installation .....	58
Completing the Code Section.....	59
Operating System Check .....	60
Multiple Reboots.....	61
Additional Commentary .....	61
Top Code Block.....	62
Sample Menu .....	63
Last Note the Requirements Script.....	65
Script Build Summary.....	65
PowerShell and Change .....	66
Why does this matter?.....	66
Conclusion.....	67
<a href="#">4. PowerShell Remoting .....</a>	68
A Brief History .....	68

Remote PowerShell – HTTP .....	68
Remote PowerShell – HTTPS.....	69
Invoke-Command.....	72
<b>5. What's New.....</b>	<b>77</b>
.....	77
Introduction.....	77
Requirements.....	77
Install OS .....	77
Active Directory .....	77
Coexistence.....	77
Desktop Clients.....	78
Increased Hardware Requirements and Limits .....	78
Licensing Changes.....	78
New Features.....	78
Windows Server Core Support .....	78
EAC External Access Block.....	79
Improved Search.....	79
Faster Failovers .....	79
Cache Improvements .....	79
Client Improvements .....	79
Email Address Internationalization .....	80
Hybrid Enhancements.....	80
Windows Server 2022 Support added.....	80
Features Removed in Exchange 2019.....	80
Unified Messaging.....	80
De-Emphasized Features .....	80
Third-party Replication API's.....	80
RPC over HTTP .....	81
DAG Support for Failover Cluster Admin Access Points .....	81
Frequently Asked Questions (FAQ) .....	81
Windows Server Core .....	82
Windows Server Core Installation .....	82
Configuring Windows Server Core .....	84
Remote Management.....	90
Adding a Server to Server Management .....	91
Windows Updates.....	92
Operating System Configuration.....	93
Event Log.....	95
Server Power Save .....	95

Exchange 2019 Installation .....	95
Installing Prerequisites.....	96
Install Exchange.....	97
Mailbox Role Installation .....	97
Edge Transport Role Installation .....	100
<b>6. Server Configuration.....</b>	<b>101</b>
Introduction.....	101
Base Installation Requirements.....	101
Configuring the Pagefile.....	102
Starting Point.....	102
Complete Script Block.....	102
Multiple Servers.....	103
Event Log Configuration.....	107
Certificates.....	110
Exchange Virtual Directories .....	114
Configuring the Virtual Directories.....	115
Client Access – OWA, Outlook Anywhere and MAPI over HTTP.....	117
Databases .....	121
Database Availability Group.....	125
Creating a DAG.....	125
Removing a DAG.....	127
Address Lists.....	128
Accepted Domains.....	130
Putting It All Together .....	131
Windows Defender .....	132
<b>7. Server Management.....</b>	<b>139</b>
Introduction.....	139
Patch Management .....	139
Start Maintenance .....	140
Stop Maintenance Mode .....	142
Starting and Stopping Exchange Services .....	144
Mailbox Server .....	144
Start All Exchange Services (Non-Edge) .....	146
Edge Transport Server.....	148
STOP Services.....	148
START Services.....	149
Database Management.....	149
Unhealthy Databases.....	149
Database Content Indexes .....	151

Activated Copies .....	151
Verifying Backups .....	154
Backups, Suspended Copies and Log Files .....	155
Circular Logging .....	156
Monitoring Disk Space .....	157
Managed Availability and Disk Space.....	159
Command Logging .....	161
Offline Address Book .....	165
Move-OfflineAddressBook.....	165
Update-OfflineAddressBook .....	165
Set-OfflineAddressBook.....	166
Database Availability Group - Management Script .....	167
DAG Create/Remove Script .....	167
Delete DAG Function.....	171
<b>8. Mail Flow.....</b>	<b>175</b>
Introduction.....	175
Mail Flow Architecture.....	175
Mail Flow Connectors.....	175
Receive Connectors.....	176
Send Connectors.....	178
Removing Connectors.....	179
Connector Reporting.....	180
Hidden Connector(s) .....	181
Message Tracking Logs.....	182
Configuration .....	182
Change Message Tracking Log Settings.....	183
Querying Message Tracking Logs.....	184
Transport Rules.....	186
Accepted Domains.....	188
Postmaster Check .....	188
Adding Accepted Domains .....	189
Removing Accepted Domains .....	190
Remote Domains .....	191
What is a Remote Domain? .....	191
New-RemoteDomain.....	194
Set-Remote Domain .....	194
Remove-RemoteDomain .....	195
DNS Records and Exchange 2019.....	196
Edge Transport Role.....	199

Edge Subscription.....	200
Address Rewriting.....	201
Configuring Anti-Spam Features.....	203
Protocol Logging.....	211
Test Cmdlets.....	213
Test Mailflow.....	214
Test-SmtpConnectivity.....	214
SMTPDiag.....	215
<a href="#">9</a> Mail Flow - Compliance.....	220
